1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1-5, 10 and 20 are rejected under 35 U.S.C. 103(a) as being unpatentable over Mardikian in view of Clarkson. Mardikian discloses the basic claimed structure including a system for simultaneously generating two jet streams (note figure 24, for example) with a water intake. Not disclosed by Mardikian is the transmission system. Clarkson teaches a transmission system with pulleys 71, 72, 91, 92 and belts to drive propellers. It would have been obvious to a person of ordinary skill in the art at the time the invention was made to form the device of Mardikian with a transmission as taught by Clarkson with pulleys and belts for improved stability and efficiency. Additionally, to form the drive pulleys as a single pulley would have been a choice of engineering design by simplifying the design.

3. Claims 6-9, 11-16, 18 and 22 are rejected under 35 U.S.C. 103(a) as being unpatentable over Mardikian in view of Clarkson as applied to claims 1-5, 10, 20 above, and further in view of Mark. Mardikian does not disclose sprocket and chains. Mark teaches a drive system with a sprocket and chain 40. It would have been obvious to a person of ordinary skill in the art at the time the invention was made to form the device of Mardikian with a sprocket and chain drive as taught by Mark for increased durability.

4. Claims 17, 19, and 21 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

5. The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the pulley, belt, sprocket and chain drives must be shown or the feature(s) canceled from the claim(s). No new matter should be entered.

Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. The replacement sheet(s) should be labeled "Replacement Sheet" in the page header (as per 37 CFR 1.84(c)) so as not to obstruct any portion of the drawing figures. If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.
